GOMAL UNIVERSITY D.I.KHAN.

#### **INTRODUCTION.**

In this study the researcher have sorted out the effects of sports on academics, whether they are negative or positive. Due to this study the researcher have to investigate the impact sports on academic achievements of the students. Further more, the researcher have enabled to know the interest of students in sports activities.

This study was under taken to make a survey of "Impact of sports on academic achievements with special reference to Gomal University D.I.KHAN."

In Pakistan there are about 24 Universities, while in NWFP there are four Universities excluding their affiliated collages. All these Universities are controlled by the U.G.C (University Grant Commission.) These Universities are administered by the Governors (Chancellor's) of their respective province.

In this study the author find out that the majority of students of Gomal University is taking interest in deferent games. But there are some obstacles in their ways. First, the examination system of the university. Second, lack of facilities in Gomal University (funds, equipment, qualified coaches) etc. Third, lack of attention of the concerned authority.

Although there are many difficulties in the ways of sportsmen, but still they have shown good position in sports at Universities level and at national level.

As the research showed that being a sportsmen, majority of students have showed good academic record. Thus we can say that sports cannot affect the students academically, if they divided their time in proper way for sports and for studies both. In this connection, to meet the international slandered of sports, the concerned authorities should pay special attention, admission quota for sportsmen should be increased, proper facilities should be provided, the funds should be utilized according to the needs and requirements. Liking and disliking should be removed then we could expect, the better results and standard of education and sports will be raised in Pakistan especially in educational institutions with in few years.

Methodology.
